Parcel Van

sales@bcvl.com

Parcel vans offer you easy access to your cargo with the maximum comfort in your van. Aluminum parcel vans are also the most economical vans we build, with the same quality you've come to expect from Brown.

Other manufacturers charge more for many of the features that we include STANDARD on our parcel and cutaway vans. Those features include:

- Translucent fiberglass roof & domestically harvested oak hardwood floor;
- Full 12" extruded aluminum front radius with cast aluminum corner caps and flush mount LED lights;
- Stainless steel rear frame.

Our parcel and cutaway vans are available in many different configurations with a variety of options. Learn more about our van options and specifications on the reverse side of this brochure.
